    - ▪ Signal Clear
    - ▪ Entrance/Exit (NX)
    - ▪ Call-On
    - ▪ Fleeting
    - ▪ Blocking
  - o Track Functionality
    - ▪ Office Blocking
    - ▪ Field Blocking
  - o Special Elements
    - ▪ Local Control
    - ▪ Snow Melter
  - o Train Tracking
- **Web based Archive Retrieval**
  - o Event Log Data
  - o Archived Authorities
  - o Archival of Train Sheet Reports

Simplifying Rail Control and Operations

Technology at work for you

CONNECTING YOUR RAILROAD OPERATIONS TO THE TECHNOLOGY YOU NEED TODAY

Rail Operations Dispatcher (RODisp) is a state of the art rail control system that increases dispatcher productivity. RODisp will allow the dispatcher to easily control CTC territory, Issue authorities, and electronically store train sheets. RODisp eliminates paper train sheets and paper forms. This will allow for the railroad to process this data for internal use. RODisp uses standard off the shelf hardware using the latest Microsoft Windows Operating Systems in a variety of hardware configurations.

RODisp uses web based technologies to allow Archive Data to be accessed through out the railroad property and remotely. The following is a list of web accessible data.

- Archived Event Log data
- Archived Authorities
- Archive data Reports
- Web based Displays

flexible solutions for your business needs

Rail Operations Application Designer
This is an easy to use state of the art program that allows the user to configure, expand and define the dispatch displays. This program will allow for easy definition of all application aspects.
